## Profile

Urban planner with published Nature-based Solutions research on 33% CO<sub>2</sub> reduction via green roofs and literature survey of improving air quality with vegetation. Experienced in climate-resilient habitat assessments, ecotourism, and Mediterranean agri-food systems in Sicily. Skilled in GIS spatial analysis, participatory stakeholder workshops, and IES-VE simulations across Pakistan, Italy, and Germany. Motivated to contribute to Living Lab oriented climate change adaptation and environmental resilience projects in the Mediterranean region.

## Skills

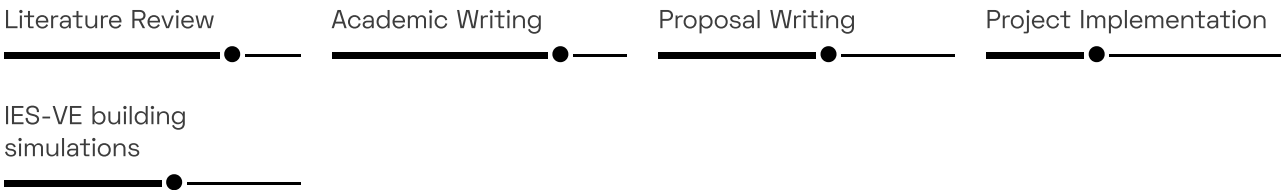

### - ENVIRONMENTAL & CLIMATE COMPETENCIES

### - TECHNICAL

### - RESEARCH & PROJECT MANAGEMENT

### - DATA ANALYSIS TOOLS

## Work experience

01/2026 – present  
Sicily, Italy

### Intern Associazione Pro Loco San Teodoro

- Conducted analysis of agri-food supply chains to enhance natural heritage and support sustainable local economies in the Mediterranean context.
- Developed sustainable tourism itineraries integrating environmental, cultural, and community priorities.
- Applied community-based approaches to integrate local stakeholder input into climate-resilient development initiatives.
- Contributed to participatory activities with local actors that resemble Living Lab processes, including co-design of itineraries and feedback cycles.

## Work experience

09/2022 – 04/2024  
Lahore, Pakistan

### Urban Planner Sheher Saaz Pvt. Ltd.

- Led strategic and participatory planning for sustainability projects, including habitat assessment and ecotourism master plans for remote villages.
- Conducted GIS and Land Suitability Analysis to integrate Nature-Based Solutions and climate change adaptation into urban development across multiple Pakistani cities.
- Collaborated with multidisciplinary teams and government stakeholders on land-use zoning and sustainable management plans, and climate-resilient infrastructure.
- Contributed to project implementation and proposal inputs for environment and climate-related planning assignments.

## Education

10/2024 – 05/2026  
Cottbus, Germany

### Master's in World Heritage Studies Brandenburgische Technische Universität

10/2018 – 07/2022  
Lahore, Pakistan

### Bachelor's in Urban Planning Lahore College for Women University

## Publications

11/2025

### Role of Vegetation in Improving Air Quality: A Literature Survey Journal Locus Penelitian dan Pengabdian

<https://locus.rivierapublishing.id/index.php/jl/article/view/5035>

Co-authored systematic literature review analyzing vegetation's biophysical mechanisms for air pollutant removal (PM10/PM2.5 deposition, gaseous absorption, microclimate regulation). Synthesized global case studies (US, UK, South Asia) to identify optimal species selection, strategic placement, and urban greening policy integration.

01/2026

### Sustainable Green Roofs: Thermal Insulation & Environmental Assessment

#### Asian Journal of Engineering, Social and Health

<https://ajesh.ph/index.php/gp/article/view/733>

Lead-authored green roof study using IES-VE simulations demonstrating U-value 0.07 W/m<sup>2</sup>-K, 33% CO<sub>2</sub> reduction (1767 kg), 14.56 MWh energy savings. Combined technical analysis with 400-resident survey assessing adoption barriers for scalable climate adaptation strategies.

## Projects

### Sustainable Habitat Plan Assessment (Aga Khan Agency for Habitat)

- Conducted GIS-based habitat vulnerability assessment to identify climate risks and resilience gaps in rural communities.
- Helped develop a Nature-Based Solutions framework, including soil conservation, water harvesting, and safer land-use patterns for hazard-prone areas.

### Eco-Tourism Master Plan (Skardu Development Authority, Gilgit-Baltistan)

- Contributed to a master plan for an ecotourism destination that balances biodiversity conservation with local livelihood opportunities in a mountain region.
- Supported carrying capacity analysis, protected area zoning, and co-design sessions with local stakeholders to ensure context-sensitive tourism development.

## Projects

### Sustainable Management Master Plan (Govt. of Gilgit-Baltistan)

- Assisted in preparing an integrated land-use plan that promotes sustainable resource use, disaster risk reduction, and resilient infrastructure in a fragile ecosystem.
- Applied multi-criteria analysis to weigh environmental, social, and economic factors and inform planning recommendations.

### Urban Farming GIS Project (Higher Education Commission Green Youth Movement)

- Developed GIS-based spatial plans to identify suitable sites for urban agriculture, focusing on food scarcity and integration of green infrastructure.
- Analyzed rooftop and ground surfaces, basic irrigation needs, and community adoption potential to support a community-based environmental initiative.

### Agri-Food Supply Chains & Sustainable Tourism (Pro Loco San Teodoro, Sicily)

- Analyzed local agri-food supply chains in a Mediterranean context to understand links between farming practices, heritage landscapes, and tourism.
- Contributed to the design of more sustainable tourism itineraries that highlight natural and cultural assets while involving local producers and communities.

### Ravi Waterfront City (Ravi Urban Development Authority)

- Contributed to neighborhood-scale planning, including zoning, landscape, and land-use layouts, using participatory design inputs from community and agency stakeholders.
- Supported the layout of a large urban forest area with afforestation zones, biodiversity corridors, and public access; considered river restoration and microclimate benefits in the design.

## Volunteering

05/2024 – 08/2024

### Jury Member National Planning Awards 2024 American Planning Association

- Reviewed sustainability and urban planning nominations, providing criteria-based feedback and participating in collaborative decision-making.
